

ARCHAN  
(Weekly Report)-Week1

| Date                    | Topic                                                       | Task                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------------------|-------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 17-11-25<br>(Monday)    | Introduction to Python                                      | No task                                                                                                                                                                                                                                                                                                                                                                                       |
| 18-11-25<br>(Tuesday)   | Swapping, casting, input functions and operators in Python  | Classwork: Swapping two numbers                                                                                                                                                                                                                                                                                                                                                               |
| 19-11-25<br>(Wednesday) | String, String formatting, Conditional statements in python | Classwork: 1. Program to calculate body mass index<br>Task: 1. Program to check if all digits in a 3-digit number are odd<br>2. Program to print Multiplication table                                                                                                                                                                                                                         |
| 20-11-25<br>(Thursday)  | Loops                                                       | Classwork:<br>1. Program to check factorial of a number<br>2. Program to count the characters of a string<br>3. Program to print the sum of numbers<br>4. Program to print Fibonacci series<br>Task:<br>1. Program to print count digits in a number<br>2. Program to print reverse of a number<br>3. print Armstrong Number from 1 to 1000<br>4. print the pattern<br>*<br>**<br>***<br>**** |
| 21-11-25<br>(Friday)    | Functions, arguments                                        | Task:<br>1. Program to check whether a number is prime or not<br>2. print the area of shapes(circle, triangle, rectangle)<br>3. Calculator menu-driven program                                                                                                                                                                                                                                |
